

CMT (Testing) Limited

CMT Testing Provide Complete site investigation & testing services for the construction, public sectors, local authorities, civil engineering & environmental industries

CMT Testing Limited is a fully independent materials consultancy, testing and investigation facility with over 30 years of service to the construction, civil engineering, environmental and associated industries.

CMT has a comprehensive scope of laboratory and site testing and investigative operations organised into a number of inter cooperative departments amongst which are:

- *Chemistry – Contaminated Land – Offsite Disposal- Chemical Analysis*
- *Concrete & Mortar*
- *Building products*
- *Geotechnical*
- *Street lighting*
- *Structures*

The above departments collectively provide you with the following key on site and off site investigative, consultative and testing services:

Contaminated Land CMT Environmental services provide structured investigation of contaminated land from initial documentary (desktop) studies through to recommendations on appropriate remedial strategies. Information obtained is suitable for site specific risk assessment in accordance with the current DEFRA/EA regulatory framework.

Offsite Waste Disposal We will provide the necessary guidance and support to achieve the safe disposal of waste to the appropriate facility via the most efficient and cost effective route.

Chemical Analysis Our onsite Chemistry Laboratory performs a wide range of analyses on materials associated with the construction industry,

Concrete & Mortar Testing On-Site Concrete Cube Making, Collecting, Testing. Air Entrainment Testing, Slump Tests, On-Site Mortar Cube Making, Mortar Cube Collecting

Building Products Assessment of raw materials through to compliance testing of the finished products including assistance in the research & development process and mix design.

Geotechnical Testing Services Technical expertise within CMT's Geotechnical department covers a broad range of client requirements for site investigation and subsequent laboratory testing.

Structures The Structural Investigation & Testing department embraces both new and existing technologies to provide expert inspection, testing and investigation work.

Street Lighting

CMT's Structural Investigation Division offer effective proven on-site inspection and testing services to the street lighting industry that cover all areas identified in the TR22 Third Edition 2007, as being at risk . We also provide geographic positioning (GPS).
